WET SET (CAST-IN-PLACE) PANEL INSTALLATION

Detectable Warning Systems

Recommended Wet Set Panel Instructions:

1. Follow all safety requirements that include but not limited to, State, Federal and/or Local safety standards.
2. Concrete shall conform to all requirements as specified by the contract document.
3. Tools required for installation are typical of those used by concrete finishers.
4. After concrete is poured the contractor shall establish finished grade using mason line or other appropriate methods. The panel shall be placed on top of the concrete and tamped in place using installer's weight or concrete vibrator to facilitate placement in a low slump concrete. Final panel elevation shall be verified.
6. Make sure the proper slope is obtained as specified in the contract document.
7. Low slump concrete may require 25 to 50 pound weights to weigh down panels after placement in concrete.
8. Steel edging trowel with a minimum of 1/8" radius shall be used to edge the finished concrete around the panel. 1/4" deep groove is required.
9. Once concrete is hardened, remove weights and panel protective cover.
10. Protect the installed tiles from pedestrian and vehicular traffic until concrete is hardened.
